RE: ITASCA CONSTRUCTION ASSOCIATES

Dear Sir:

Itasca Construction Associates was the Design/Build Contractor for the Critikon facility at Woodland Corporate Center. Phase one of this two-phased project consisted of a new 42,000 sf single story office/research and development building. Phase two was the interior office and research laboratory construction.

Itasca was instrumental in providing cost estimates and solving constructability issues throughout the design phases. Their input was influential in the development of cost efficient, and process effective design documents.

During the construction phase of the project Itasca provided outstanding service and kept the entire team informed. The timely information Itasca provided enabled the owner and occupant to make critical decisions that enhanced the schedule. The end product was a quality facility that was delivered on time and at a very competitive price.

Over the years we have developed a relationship of trust and respect with Itasca, which is why they are currently building their eighteenth building for Liberty Property Trust. Additionally they have constructed numerous interior corporate offices, management information facilities, and call centers.

We highly recommend Itasca Construction Associates.

Sincerely,

Robert Goldschmidt
Senior Vice President
